Description
Description (optional)

Method
List
The copilot will try to match an item on the list based on what the customer says.

Smart matching
☒ on
The Smart matching option enables the copilot's understanding of natural language. This can help match misspellings, grammar variations, and words with similar meanings. If the copilot isn't matching enough related words, enhance the copilot's understanding further by adding synonyms to your list items.

Hello, I'm Copilot Assignment 3, a virtual assistant. Just so you are aware, I sometimes use AI to answer your questions. If you provided a website during creation, try asking me about it! Next try giving me some more knowledge by setting up generative AI.

29 minutes ago

find my nearest store

Just now

I'd be glad to help find a store near you.

Just now

Which location are you interested in?

Just now

Redmond

Just now

Yes

No
